### *Highlights from the Celebration Wall*

A huge well done to all our pupils at Vyner Campus! This newsletter celebrates the fantastic achievements, effort and enthusiasm we have seen across the Celebration Wall. From outstanding classwork and creative projects to sporting success and enrichment opportunities, our pupils continue to show great attendance to learning, resilience, creativity and a real desire to be their best.

## English & Literacy

Pupils have produced some excellent English work this term, including reading and enjoying *Pig Heart Boy*, comparing different writers' perspectives, identifying explicit and implicit information, writing poetry and creating thoughtful, creative responses. Great engagement and high-quality work across the campus!

## Maths

In Maths, pupils have explored Venn diagrams, solved equations (including with brackets) and completed a range of assessments. Many have shown real perseverance, taking on increasingly challenging work and demonstrating growing confidence and skill. Well done for your determination!

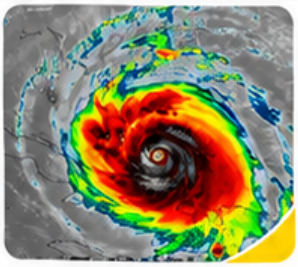

## Science, Computing & STEM

A busy and exciting term across Science, Computing and STEM! Pupils have studied atomic structure, completed practical experiments, and developed computing skills using formulas and functions. We've seen brilliant 3D animations, creative binary art, and progress in music production with Yousician. A real highlight has been the hands-on kit car/STEM project, with pupils working on the chassis and key components.

## Geography & Humanities

Pupils have explored a wide range of fascinating topics, including China's One Child Policy, tropical storms, coasts and coastal management, population (including population pyramids), earthquakes and wider world learning. These lessons have sparked thoughtful discussion and some excellent analysis.

## PSHE/RSE & Wellbeing

PSHE and RSE lessons have focused on important real-life topics, including prejudice and discrimination, healthy relationships, emotional vocabulary (ASDAN), regulation strategies and mutual respect. Pupils have also developed practical knowledge, such as how to calculate tax from different wages, showing maturity and great understanding.

## Art, Food Tech & Creativity

Creativity has been in full flow, with pupils developing art techniques, producing impressive artwork and exploring scrapbooking. In Food Tech, we've seen some delicious results, including fairy cakes, cheesecakes and chocolate cake, with several "star baker" moments! A fantastic display of skill, creativity and teamwork.

## Sport & Enrichment

There has been plenty of success in Sport and enrichment this term. The football team secured two great wins (1–0 and 3–0), showing skill, discipline and teamwork. Pupils also represented the school brilliantly in Active Tag. We've celebrated our Athletes of the Week, recognising hard work and dedication, and pupils have achieved a brilliant start to their Duke of Edinburgh Award, including a successful expedition with hiking, camp craft and teamwork.

## Celebrating Success

A huge well done to every pupil at Vyner Campus for being **Safe, Ready and Respectful.** We are proud to recognise all forms of progress – in lessons, through enrichment, in the community and in personal development. Every effort, every improvement and every achievement makes a difference.

*"Every achievement matters at Vyner Campus."*
